

English 102: “Inquiry into Violence: Definitions and Depictions”—R. Bryan

This section of English 102 will explore how broad categories and individual episodes of violence are, and have been, depicted in a variety of cultural media, as well as how such depictions simultaneously reflect and influence the ways we define aspects and occasions of violence. While students investigate the processes involved in identifying and understanding violence, emphasis will be placed on the exercise and development of their research and writing skills.
