175 Years of Engineering at the University of Tennessee

Engineering's origins date back to the 1800s, with the first engineering classes offered in 1836. Outstanding teachers and educators, innovative researchers, and transforming innovations are all part of engineering's amazing 175-year journey at UT.

The college breaks ground on the John F. Sridhar Engineering Building.

The University of Tennessee College of Engineering's origins date back to the 1900s, with the first engineering classes offered in 1836. Outstanding teachers and educators, innovative researchers, and transforming innovations are all part of engineering's amazing 175-year journey at UT.

Engineering was initially located in False Hall in 1868. Ten years later, classes were moved to Ewing Hall. Over the next one hundred twenty-five years, engineering moved from Initially, powering to intellectually powering the university. Currently, the college spans twelve buildings that house the academic units within the College of Engineering.

The college's offerings have expanded under his presidency, including the establishment of the Tau Beta Pi engineering society's headquarters on the UT campus.

The college holds its first recruiting venue and over 1,200 students an opportunity to attend.

The program offers students an opportunity to attend.

The program is established.

The Department of Nuclear Engineering is named.

The Engineering Building.

The AEDC.

The University of Tennessee Space Institute is established.

The University of Tennessee consolidation in a new $4 million program.

The college established the Department of Nuclear Engineering.

The college established the Department of Mechanical Engineering.

The college established the Department of Electrical Engineering.

The college established the Department of Industrial Engineering.

The college established the Department of Civil Engineering.

The college established the Department of Computer Science.

The college established the Department of Aerospace Engineering.

The college established the Department of Materials Science.

The college established the Department of Biomedical Engineering.

The college established the Department of Mechanical Engineering.

The college established the Department of Civil Engineering.

The college established the Department of Electrical Engineering.

The college established the Department of Industrial Engineering.

The college established the Department of Computer Science.
