Stat 571 - Ramón V. León

1

Statistics 571

Statistical Methods

Ramón V. León
University of Tennessee, Knoxville

Class Objectives

By the end of this class you will:

- Understand some of the main statistical concepts used to extract information from data
- Be able to use JMP to extract information from most common forms of data
- Be prepare to take follow-up courses in statistics

General Remarks

- Course homepage
 - <http://web.utk.edu/~leon/stat571/>
- Textbook
 - Course follows the book very closely. Read it before coming to class.
 - We will omit material not necessary to achieve course objectives. The student is encouraged to read omitted material.
- Class notes
 - Download them from the course homepage and print them.
 - Take notes on them while I lecture
- My email is rleon@utk.edu
 - Homework and exams submitted by emails
- Complete the Centra tutorial so that you can fully participate in class
