

Curriculum Vitae

Robert N. Stewart

January, 2015

Education

Ph.D. Geography, 2011, University of Tennessee
M.S. Mathematics, 1995, University of Tennessee
B.S. Mathematics and Statistics, 1992, University of Tennessee

Research Interests

I am geographic data scientist in the Geographic Information Science and Technology group at the Oak Ridge National Laboratory and a joint faculty assistant professor in Geography at the University of Tennessee. My work is focused on statistical and computational methods in the areas of spatial and spatiotemporal modeling, with an emphasis on uncertainty, risk, and decision analytics. Areas of application include environmental risk, population dynamics, socioeconomics, and health. Quantifying uncertainty and risk as well as understanding the implications of both for decision making is a recurring theme in my work.

Employment

Oak Ridge National Laboratory (2009-present)

Research is typically computational in nature with a focus on population dynamics, small area estimation, spatial and spatiotemporal analytics, uncertainty analysis, risk, and decision support. Currently leading the World SpatioTemporal Analytics and Mapping Project (WSTAMP), the Spatial Analysis and Decision Assistance Project (SADA), and significantly contributing to the Population Density Tables Project (PDT) in addition to two internally funded R&D projects on population distribution and analytics at the energy-water nexus. I routinely serve as a mentor for the HERE, SULI, and RAMs summer intern programs.

University of Tennessee Joint Faculty Assistant Professor of Geography (2011-present)

Focus is on proposal development, serving on graduate committees, teaching independent studies, and mentoring students in summer programs at the Oak Ridge National Laboratory.

University of Illinois at Chicago, School of Public Health Adjunct Faculty (2013-present)

Activities include developing SADA educational materials for online courses hosted by the UIC, engaging with faculty on current and upcoming research opportunities, and serving on graduate committees.

University of Tennessee Senior Research Associate (1994-2010)

Activities included serving as principle investigator, technical lead, and in most cases point of contact with sponsoring agencies such as the Environmental Protection Agency, the Nuclear Regulatory Commission, the Department of Energy, and the Oak Ridge National Laboratory. Effort centered largely on management and development of the Spatial Analysis and Decision Assistance (SADA) software program.

Professional Affiliations

The Society for Risk Analysis
Association of American Geographers
International Society for Bayesian Analysis
International Association for Mathematical Geosciences
World Health Organization Chemical Risk Assessment Network Member

Reviewer

Risk Analysis
Applied Geography
Mathematical Geosciences
Environmental Modelling and Software
Stochastic Environmental Research and Risk Assessment

Honors

2014 DOE Oak Ridge National Laboratory Significant Event Award for R&D in WSTAMP Project
2010 Environmental Protection Agency 2010 Scientific and Technological Achievement Award
