9:00 a.m. (central)  Dean Munn and other BLA staff will present progress to-date on the sub-area analysis work they are performing for TDOT and the recent external travel survey project that BLA is conducting in Knoxville.

Next Robert Schiffer of Cambridge Systematics will discuss his work using 10 of the 11 TN MPO models in analyzing the I-40/I-81 corridor as part of a project for TDOT.

Finally Bob Rock will lead a discussion of the Proposed Tennessee MPO Travel Demand Modeling Policy. TDOT has sent out this proposed policy to all the MPOs in the state. Bob asks that everyone come to the TNMUG meeting with comments and questions that we can discuss.

This proposed new Modeling policy is intended to raise the state-of-the-practice of Travel Demand Modeling in TN. It is very important that you come to this meeting to discuss any suggestions or concerns that you may have.

We do plan to provide lunch so it is also important for you to let me know how many people from your organization plan to attend. Please reply to my email with that number of attendees from your agency ASAP.

Directions to the Hotel are provided below.
