Course structure

You will need: (1) textbook; (2) WebAssign account for home work; (3) Clicker; (4) Lab Manual (see other sections of class website for more details).

Lectures in Nielsen 415: 3 times per week on MWF from 1:25 to 2:15 p.m.

Attendance is mandatory and will be part of the grade. If I call your name during the class, you should respond, otherwise you will be considered absent.

Students are responsible for their own learning. Students are required to read a chapter in the textbook before the class where it will be discussed.

Class time will be dedicated mostly to the discussions of concepts, answering your questions, and quick tests with “clickers”.

Recitation: Once per week with your lab TA; it will be focused on the problem solving.

Labs: Once per week. Dedicated to the development of hands-on experience with phenomena under study.

Home Works through WebAssign: one per week (see due date) at 11:59 pm.

Tests: three in-class during semester and one final. No make-up tests!

The campus syllabus applies to this class campus syllabus.

No cheating will be tolerated! Using clickers of absent students in class is a severe violation of University Standard of Conduct #1 and will be punished.
