Syllabus Physics 231

Course structure

- Click [here](#) for detailed class syllabus
- You will need: (1) textbook; (2) Mastering Physics (MP) account for homework; (3) Clicker; (4) Lab Manual (see other sections of class website for more details).
- Lectures in Nielsen 415: 2 times per week Mo and We 11:15 am – 12:05 pm.
- Attendance is mandatory and will be part of the grade. If your name is called during the class, you should respond, otherwise you will be considered absent.
- Students are responsible for their own learning. Students are required to read a chapter in the textbook before the class where it will be discussed.
- Class time will be dedicated mostly to the discussions of concepts, answering your questions, solving problems and quick tests with “clickers”.
- Labs: Once per week. Dedicated to the development of hands-on experience with the phenomena under study.
- HW through MP: ~ one per week; see Syllabus for due dates, due time 11:59 pm.
- Tests: three in-class during semester and one final. No make-up tests.
- The campus syllabus applies to this class [campus syllabus](#).
- No cheating will be tolerated! Using clickers of absent students in class is a severe violation of University Standard of Conduct #1.
