Define, discuss, and compare Cinematic War as it reflects and affects American culture in the films of the Vietnam Cycle and the Post-Vietnam Progression.

In your essay be as precise, accurate, and complete as possible when referencing lectures, reading, and films. Precisely and accurately define film terms and key concepts that you use, or which are included as part of the question. Plot summaries and vague references to action will not suffice when discussing films—you are expected to employ specific film details in your analysis. You do not need to analyze every film screened to date. Nor must you equally emphasize every film selected in your essay—but carefully justify your choice of emphasized films.

Honor Statement:
