Polygon Word Web

1. Using a dictionary, define the word **polygon**.

2. Use the word **polygon** to create a word web with at least five branches off the main word using the names and shapes that were mentioned in the lesson. (an example is given to start you off)

3. By each new word briefly describe the characteristic that makes it a polygon. Draw an example by the word.

4. Draw a dotted line between the words that have a similar characteristic. Use arrows to show direction of characteristic.
