• Safety Issues on Ossabaw

  • Bring whatever you need for your basic health care, including insect repellant, tick spray which you use prior to departure, sun tan lotion, bandaids, medications.
  • Decide on who your partner will be (someone whom you tell if you go off alone, which I encourage)
  • Show someone (your partner) where your driver’s license/insurance cards are in case you are injured

• CPR/First Aid Certification

Please let me know and sign my master sheet if you have either of these types of knowledge.

Safety Regarding Animals

• Under no circumstances will alligators be fed or approached.
• Avoid contact with the feral pigs. They are wild and will not approach us.
• When looking for Loggerhead Sea Turtles on the beach at night, never approach the turtle as she will be on a mission looking for a place to lay her eggs.
• Do not shine your light on the night beach walks.
• Cooking groups must literally hand the garbage from the roof of the picnic pavillion to avoid raccoon and possum invasion. That is one reason why reducing the amount of garbage is so crucial.

Emergency Information: Please bring the emergency info form to the first class. Fill it out completely.
