Stuck in a dead-end job?
Tired of low pay and long hours?
Feeling the strain of being ordered around
by an unthinking, slave-driving boss?
Want to get on the downhill path to success?

Study to become a

MOLECULAR MECHANIC!

Yes, now you can get in on the entry level in
this field, as a way to the HIGH-PAYING job that
you've always dreamed about!

There is a nation-wide shortage today of
professionally trained MOLECULAR MECHANICS. There is
a great demand for people trained in repairing
broken hydrogen bonds, reworking sterically strained
molecules, and processing non-planar pi systems.

We are a modern, completely equipped training
institute, with the complete program that you need!

It is designed to help people like you who HAVE THE
HARD DRIVE TO SUCCEED, and the MEMORY to do so. You
can MONITOR your progress as you go, and learn
the KEYS to achievement! We provide high-quality
instruction and actual ON-THE-JOB TRAINING, so
that you can learn this needed job skill in the
minimum time.

WE CAN PUT YOU ON THE MINIMUM ENERGY PATH TO SUCCESS!

WE HAVE THE GLOBAL SOLUTION TO YOUR PROBLEMS!

Structure your life now to optimize it!

Inquire about our advanced training program as a
Quantum Mechanic.

Translation: the Chem 550 training class for Molecular Mechanics
is this Saturday, Sep 11th, 8:30 AM, BU 511, followed by a session
in the Departmental PC lab, learning to use the program. All are
welcome, but if you're not in Chem 550, please email Prof. Bartmess
ahead of time so sufficient handouts can be run off.
